

# ANTIQUÉ MIRROR / COLORED MIRROR

## PRODUCT DATA SHEET

---

**PRODUCT LINE:** GlasPro-Antique Mirror / Colored Mirror  
**COLLECTIONS:** GlasPro-Antique Mirror / Colored Mirror "Specialty Reflections"

### Overview

GlasPro-Antique Mirror is a range of high specification Antique mirror products, with excellent protection of the Antique Mirror silver layer. In addition to being environmentally friendly to manufacture, the GlasPro-Antique Mirror products offer far greater resistance to natural atmospheric corrosion – thus reducing the unsightly problems of black edges and spot faults.

GlasPro-Antique Mirror "Protect" has the same features as GlasPro-Antique Mirror with the addition of a special safety film backing that protects against possible injury resulting from breakage and complies with ANSI Z97.1 and 16CFR 1201 standards.

Can be also laminated for safety and to meet codes for the interior of an elevator.

### Applications

GlasPro-Antique Mirror products can be utilized across a vast array of buildings and applications, including walls, partitions, doors, displays, ceilings, cupboards, wardrobes and other furniture.

GlasPro-Antique Mirror Protect is the ideal choice for applications anywhere in the where there is greater risk of accidental damage, e.g. doors, wardrobes.

### Benefits:

- Completely lead-free top coat and < 0,15% lead in the wet basecoat
- Excellent resistance to natural atmospheric corrosion
- Higher corrosion resistance and improved resistance to chemical attack from cleaners and certain adhesives than conventional mirrors
- Environmentally friendly manufacturing process producing less waste and ensures easier onward recycling
- Compliant with EN 1036
- Available in 5mm thicknesses monolithically and thicker if laminated

### Additional info for GlasPro-Antique Mirror Protect

- Incorporates special safety film for added impact protection
- Achieves impact performance to EN 12600 Class 2(B)2

### Max Sizes:

84x130 Stock Sheets 5mm thick

### Glass Handling and Storage

Care needs to be taken during handling and glazing to ensure that glass damage does not occur. Do not allow glass edges to contact the frame or any hard surface during installation. Refer to the Glass Association of North America (GANA) glazing manual for proper handling instructions.

Improper glass storage may result in damage to glass, glass surfaces or coatings. Store glass crates properly to prevent them from tipping. Also, ensure proper blocking and protection from outside elements.

GlasPro recommends a 5-8° lean against two wide, sturdy uprights, which are capable of withstanding the crate weight.

Once the glass is installed the general contractor or building owner should provide for glass protection and cleaning. Weathering metals, alkaline materials or abrasive cleaners may cause surface damage. Windblown objects, welding sparks or other material that contacts the glass surface during construction may cause irreversible damage.

### Maintenance and Cleaning

To maintain aesthetics, it is important to clean the glass during and after construction. For routine cleaning, use a soft, clean, grit-free cloth and a mild soap, detergent, or window cleaning solution.

Rinse immediately with clean water and remove any excess water from the glass surface with a squeegee. Do not allow any metal or hard parts of the cleaning equipment to contact the glass surface.
